**Re: WT Docket No. 17-200  
Notice of *Ex Parte* Presentation**

Dear Ms. Dortch:

On April 17, 2018, C. Cole Crews, Career Engineer, NEO Strategy and Planning, of Ameren Services Company (“Ameren”); Robert Schwartz, Chief Strategy & Development Officer of pdvWireless, Inc. (“PDV”); Alice Moy-Gonzalez, VP of Strategic Development, PDV; Christopher Guttman-McCabe of CGM Advisors, consultant to PDV; and undersigned counsel met with the Wireless Telecommunications Bureau personnel listed below. Mr. Crews described Ameren’s in-depth analysis of current and future wireless communications requirements, its determination that those requirements demand a broadband solution, and the challenges faced by a utility in identifying spectrum on which that broadband need can be addressed. He explained that Ameren recently had requested experimental authority from the FCC to test broadband operations on the 900 MHz spectrum under consideration in this proceeding by using spectrum licensed to PDV and urged prompt action on that [application](#), in light of statutory and other time-sensitive regulatory considerations.

Kindly refer any questions or correspondence regarding this matter to the undersigned.

Very truly yours,

Elizabeth R. Sachs
